

PCC's Customized Digital Patient-Intake Forms

No more keeping track of all that paper and deciphering all that illegible handwriting.

Now patients can fill out their intake form online and press submit before their appointment.

Patient Benefits:

- Patients nervous to sit in your waiting room don't want to fill out forms, touch clipboards, papers and pen handled by staff and other patients.
- Patients don't want to print out multiple pages on their home computer to fill out and bring with them to their appointment.

The screenshot shows a digital patient intake form on a laptop screen. The form is titled "Patient Intake Form" and includes a note, a consent section, and a basic information section. A progress indicator shows 9% completion. The form is branded with the practice name and address: "364 South Park Street, Suite 109, Toronto, ON, melissa@tiley.com, http://myweb site.com".

Practice Benefits:

- Patients pleased.
- Info is housed in a fully HIPAA-compliant database.
- Forms are branded for your practice.
- Credentialed 24/7 access to the database.
- Notification of all submissions. Optional corresponding email account.
